

MASTER OF HEALTH SCIENCE (MHSc) IN BIOETHICS

Joint Centre for Bioethics
UNIVERSITY OF TORONTO

Improving Health Through Bioethics

Bioethics is concerned with finding practical answers to difficult value-based questions faced by patients and families, health professionals, health researchers, health administrators and health policymakers. The aim of the field of bioethics is to improve health. Interdisciplinary in nature, bioethics draws from many areas across the humanities, and health and social sciences. The University of Toronto's MHSc in Bioethics program reflects this interdisciplinarity, making it an exemplary model of interprofessional education.

CLASSES AT U OF T

MHSc in Bioethics Program

This professional degree program is designed to help students address a variety of real-world ethical challenges in health, healthcare and research. The program's interactive, problem-based learning approach emphasizes interprofessional exchange and practical experience informed by theory. The two-year, course-based program is offered in a modular format allowing high achieving professionals to earn a master's degree without interrupting their careers.

Who should apply?

- Health Practitioners
- Health Administrators or Policymakers
- Research Ethics Board Chairs, Members or Administrators
- Clinician Educators or Faculty Members
- Clinical Residents and Fellows
- Lawyers, Journalists, Policy Analysts, Privacy Officers, Regulators, and Researchers
